Allowable Subject Matter

Claims -12, 4-12, and 14-15 are allowed.

The following is an examiner's statement of reasons for allowance: The claims are allowable because the prior art does not teach or suggest an optical recording medium comprising a substrate which has a clamping area and recording area thereon where the clamping area has a surface which is higher than the surface of the recording area and the entire substrate is formed by injection molding in one piece. The closest prior art, US 6,214,430, disclose a substrate which has a reinforcing member bonded to the clamping area giving the clamping area a surface higher than the surface of the recording area. However, the two pieces which are bonded together are formed of material having different thermal expansion coefficients are result in the substrate having tensile stress which teaches away from the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
